

| Johnathan Goode Bernal

(832) 387-9379 | Johnathanbernal24@gmail.com | Houston, Texas

| SUMMARY

Network professional with hands-on experience supporting network hardware, structured cabling, routing, switching, and network communications in both technical lab environments and real-world infrastructure operations. Experienced with traffic signal and ITS network systems, including CAT5 cabling, network switches, radios, CCTV cameras, Bluetooth devices, battery backup systems, and signal-to-server communications with a Traffic Management Center. Proficient in Cisco CLI, VLANs, IP addressing, NAT/PAT, routing protocols, firewalls, and network traffic analysis. Skilled in troubleshooting physical layer issues, switch connectivity, network communication failures, Windows Server, Active Directory, Linux administration, and basic scripting for automation and troubleshooting. Known for strong communication, leadership, and a disciplined approach to diagnosing and resolving technical issues.

| KEY SKILLS

Server Administration • Routing and Switching • Network Design • Virtualization • Computer Hardware
Networking Hardware • Windows Server • Linux • Troubleshooting

| EDUCATION AND CERTIFICATIONS

Cisco CCNA	In Progress
Microsoft AZ-900	May '26
CompTIA Network+ Certified	April '26
Associate in Applied Science – Cyber Security Texas State Technical College	Dec '25 Rosenberg, TX

Relevant Coursework:

- Fundamentals of Networking Technologies | Implementing and Supporting Servers | Introduction to Digital Forensics
- Networking with TCP/IP | Secure Linux Administration | Routers | Server Virtualization | Information Technology Security
- Intrusion Detection | Firewalls and Network Security | Computer System Forensics | Enterprise Networking | Scripting

| PROJECTS AND EXPERIENCE

Texas State Technical College Jan '24 – Dec '25

Networking & Infrastructure

- NAT / PAT implementation (static, dynamic, and overload)
- Routing protocols (RIP, OSPF, EIGRP)
- VLAN design and configuration
- Network segmentation and traffic flow analysis
- Firewall rule configurations and access control
- Cisco Packet Tracer network design and simulation

Security & Monitoring

- Network traffic analysis using Wireshark
- Security audits (basic configuration and policy reviews)
- Network troubleshooting and incident identification
- Basic network forensics analysis
- Access control and security best practices

Systems Administration

- Active Directory administration (Domains, OUs, GPOs)
- Windows Server 2019 & 2022
- Linux system administration (Ubuntu, Debian, Kali)
- Server management
- Virtualized network environments

Scripting & Automation

- Bash scripting
- PowerShell scripting
- Python scripting
- Automating configuration checks and system tasks
- Script-based troubleshooting and data processing

| PROFESSIONAL EXPERIENCE

Missouri City Public Works

Missouri City, TX

Traffic Operations

Signal, ITS & Network Technician

July '26 – Current

- Installed, programmed, maintained, and troubleshot traffic signal radios, network switches, Bluetooth devices, CCTV cameras, battery backup systems, and CAT5 network cabling.
- Supported network communications between traffic signal equipment, city servers, and the Traffic Management Center to help maintain reliable citywide traffic operations.
- Diagnosed and repaired communication issues affecting traffic signal systems, ITS equipment, and related network infrastructure.
- Used remote access tools to troubleshoot network-connected traffic signal devices, switches, radios, and ITS equipment, diagnosing communication failures and restoring connectivity between field devices, servers, and the Traffic Management Center.
- Coordinated with ITS and tower contractors during equipment installations, programming, preventative maintenance, and system repairs.
- Performed preventative maintenance, inspections, documentation, inventory tracking, and emergency response for traffic signal and ITS systems.

Life Time Fitness

Sugar Land, TX

Fitness Facility

Operations Supervisor

Mar '24 – July '26

- Improved daily operations of the fitness facility through distinct strategies.
- Improved the work environment by fostering team building through various methods.
- Delegated daily tasks to team members to improve productivity and workflow.
- Assured that high-quality customer service was delivered and the customer experience was made memorable.
- Elevated customer service by resolving minor issues and following up with members and clients to improve their experience.
- Performed audits on department operations to evaluate processes in conjunction with business requirements.
- Generated reports on department performance by monitoring employees' day-to-day activities.
- Conducted employee reviews and gathered feedback on workloads to develop strategies for mutual improvement.

JM Eagle Manufacturing Co

Wharton, TX

Pipe Manufacturing Company

Supervisor / Production Technician

Sep '19 – Jan '24

- Drove an increase in team productivity by establishing and communicating clear expectations for staff members through regular team meetings and evaluations.
- Crafted personalized training plans to target specific skill gaps and technical requisites, fostering employee morale and retention while nurturing professional development through the use of performance assessments.
- Fostered team cohesion by skillfully mediating conflicts among team members, nurturing a collaborative and morale-boosting work environment.
- Managed daily operations of the department to ensure smooth workflow and timely task completion, resulting in increased production efficiency.
- Collaborated cross-functionally to align departmental efforts with organizational objectives, cultivating teamwork.
- Maintained machines, diagnosed malfunctions, and conducted basic repairs utilizing diagnostic tools to uphold equipment functionality and implement preventive maintenance measures for adherence to maintenance standards.
- Analyzed root causes of recurring technical issues, resulting in long-term solutions that significantly reduced downtime and improved system reliability to enhance user productivity.

| ADDITIONAL INFORMATION

- Languages: English (native) and Spanish (native)
- Strong work ethic and professional communication skills, with hands-on experience supporting IT, networking, and server infrastructure in a real-world operational environment.
